HIP HISTORY

Built in 1985, the all-suite hotel is the exquisite result of a lengthy, five-year search to distill the best features from the finest hotels in the world

The Mayfair Hotel & Spa is an extraordinary, cosmopolitan sharing of worldwide architectural influences and interior furnishings, most notably Spaniard Antoni Gaudí

ARCHITECTURAL HIGHLIGHTS

More than 20 master craftsmen helped interpret the architect's ideas: artists in Miami, woodcarvers in the Caribbean, hardware makers in Hong Kong, carpenters in Central America, as well as North Carolina, Georgia and Colorado.

The exterior walls are not exactly walls but hundreds of bas-relief flowers in carved concrete, framing fern-like branches of blue-painted copper

For intimacy, visitors enter through a small single door set in an arched panel of richly carved Honduran mahogany.
